

CRIST S.A. ul. Czechosłowacka 3 81-336 Gdynia Poland

CRIST S.A. – GENERAL INFORMATION

CRIST S.A. is a production shipyard with above 26 years of experience in the marine industry. The company currently employs 1500 workers (extended up to 2000 people with long term cooperating companies) and has a production capacity of 50 000 tons of steel structures per year. It is one of the largest Polish companies operating in the sector of shipbuilding and maritime technical construction. The production site is located in Gdynia (Poland), where all fabrication and assembling work will be conducted.

CRIST activity started in 1990 – initially as a business partnership of two natural persons and since 2010 as a resiliently growing joint stock company.

Shipbuilding, offshore constructions, steel structures, sea engineering, civil engineering – these are the fields we specialize in. We steadily develop and adjust our offer to changing market demands. We are the only shipyard in Europe which has already constructed 3 units for the installation and servicing of sea wind farms.

CRIST has always been active in the field of shipbuilding and steel constructions. Economic changes and growth of renewable technologies – such as wind and hydroelectric energy – created possibilities of activity on new markets.

For that reason we are presently participating in the implementation of projects of specialized coastal structures, sea transport and units for exploration of marine resources.

CRIST belongs to the group of companies distinguishing themselves through innovativeness, niche products and the organization of the supply chain. The company

cooperates with Clients from Poland, Germany, Norway, Denmark, Finland, Iceland, France, Belgium, The Netherlands and Scotland

Our priority is to secure services and products which not only meet the acceptance but also exceed Clients expectations and demands. In our performance we focus on reliability. We care about the highest quality which is always controlled and certified by international technical organizations and classification societies.

CRIST S.A is located on south cost of Baltic Sea.

Total area of production plant covers 28 ha next to the Port of Gdynia. Location close to the international Gdańsk Airport (27km), A1 highway and ferry connections with Scandinavia. CRIST warehouses are connected to railways lines.

MARS FIZ has been operating since the second half of 2010, authorized by the Polish Financial Supervision Authority. The Fund manages the portfolio of majority stakes in 12 private equity companies. They comprise companies from the sector of ship repairs and offshore steel structure building, as well as companies whose main assets are real estate properties.
